

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A gaming device comprising:

a game operable upon a wager by a player;

a plurality of award groups, each of said award groups including at least one indicator ~~and at least one award~~, a plurality of said award groups including a plurality of indicators;

a plurality of awards, wherein each of the award groups is associated with at least one of said awards;

~~an indicator generator operable to generate and associate a number of indicators with each of the award groups; and~~

a processor operable to:

(a) cause the indicator generator to generate and associate a number of indicators with each of the award groups,

(b) for each of the award groups, accumulate the number a quantity of indicators in each of the award groups based on corresponding to the number of indicators that is associated with the that award groups group by the indicator generator,

(c) when all of the indicators have been accumulated in any of the award groups:

(i) provide to the player the awards associated with any of the award groups in which all of the indicators have been accumulated ~~when all of the indicators have been accumulated in said award groups,~~

~~(d)(ii)~~ randomly determine whether to end the game, and

~~(e)(iii)~~ if it is determined not to end the game, reset the indicators in the award groups including associated with the awards provided to the player, and

~~cause the indicator generator to generate and associate a number of indicators with each of the award groups if it is determined not to end the game, and~~

~~(f)-(d)~~ repeat (a) to ~~(e)-(c)~~ until it is determined to end the game.

Claim 2 (original): The gaming device of Claim 1, wherein the indicator generator includes at least one reel.

Claim 3 (original): The gaming device of Claim 1, wherein the indicator generator includes a mechanical wheel.

Claim 4 (original): The gaming device of Claim 1, which includes a substantially transparent plate including different color sections which is positioned adjacent to the indicator generator.

Claim 5 (original): The gaming device of Claim 1, which includes a probability of ending the game associated with the game.

Claim 6 (original): The gaming device of Claim 5, wherein the probability of ending the game is randomly determined.

Claim 7 (original): The gaming device of Claim 5, wherein the probability of ending the game is pre-determined.

Claim 8 (original): The gaming device of Claim 5, wherein the probability of ending the game is determined based on a wager made by the player.

Claim 9 (original): The gaming device of Claim 5, wherein the probability of ending the game changes after each time all of the indicators have been accumulated in at least one of said award groups.

Claim 10 (original): The gaming device of Claim 5, wherein the probability of ending the game changes after a plurality of times all of the indicators have been accumulated in at least one of said award groups.

Claim 11 (original): The gaming device of Claim 1, which includes at least one illumination device connected to each of the indicators.

Claim 12 (original): The gaming device of Claim 11, wherein the illumination devices include different color lights.

Claim 13 (currently amended): The gaming device of Claim 12, wherein the illumination devices connected to the indicators of at least two of the award ~~columns~~ groups include different color lights.

Claim 14 (currently amended): The gaming device of Claim 1, wherein the numbers of indicators associated with each of the award groups by the indicator generator are randomly generated.

Claim 15 (currently amended): The gaming device of Claim 1, wherein the numbers of indicators associated with each of the award groups by the indicator generator are generated based on a wager made by the player.

Claim 16 (original): The gaming device of Claim 1, wherein the processor is operable to reset at least one of the indicators in at least one of the award groups when the award associated with the award group is provided to the player.

Claim 17 (currently amended): A gaming device comprising:

a display device;

a plurality of award groups displayed by said display device, each of said award groups including at least one indicator ~~and at least one award~~, a plurality of said award groups including a plurality of indicators;

a plurality of awards, wherein each of the award groups is associated with at least one of said awards;

a rotatable display positioned adjacent to the award groups and connected to the display device, said rotatable display including a plurality of fixed values, each of said values ~~representing corresponding to a number~~ numbers of indicators; and

a processor operable to:

(a) rotate the rotatable display,

(b) cause the rotatable display to stop and align ~~the one of the~~ values with each of the award groups,

(c) for each of the award groups, accumulate the number of indicators in each of the award groups based on the number of indicators associated corresponding to the value aligned with the that award-groups group,

(d) when all of the indicators have been accumulated any of the award groups:

(i) provide to the player the awards associated with any the of the award groups ~~when in which~~ all of the indicators have been accumulated in said award groups,

~~(e)(ii)~~ randomly determine whether to end the game,

~~(f)(iii)~~ if it is determined not to end the game, reset the indicators in the award groups including associated with the awards provided to the player and cause the rotatable display to rotate and associate the fixed values with each of the award groups if it is determined not to end the game, and

~~(g)(e)~~ repeat (a) to ~~(f)(d)~~ until it is determined to end the game.

Claim 18 (original): The gaming device of Claim 17, which includes a substantially transparent plate including different color sections which is positioned adjacent to the rotatable display.

Claim 19 (original): The gaming device of Claim 17, which includes a probability of ending the game associated with the game.

Claim 20 (original): The gaming device of Claim 19, wherein the probability of ending the game is randomly determined.

Claim 21 (original): The gaming device of Claim 19, wherein the probability of ending the game is pre-determined.

Claim 22 (original): The gaming device of Claim 19, wherein the probability of ending the game is determined based on a wager made by the player.

Claim 23 (original): The gaming device of Claim 19, wherein the probability of ending the game changes after each time all of the indicators have been accumulated in at least one of said award groups.

Claim 24 (original): The gaming device of Claim 19, wherein the probability of ending the game changes after a plurality of times all of the indicators have been accumulated in at least one of said award groups.

Claim 25 (original): The gaming device of Claim 17, which includes at least one illumination device connected to each of the indicators.

Claim 26 (original): The gaming device of Claim 25, wherein the illumination devices include different color lights.

Claim 27 (original): The gaming device of Claim 25, wherein the illumination devices connected to the indicators of at least two of the award groups include different color lights.

Claim 28 (currently amended): The gaming device of Claim 17, wherein the ~~numbers~~ values of indicators ~~associated~~ aligned with each of the award groups are randomly generated.

Claim 29 (currently amended): The gaming device of Claim 17, wherein the ~~numbers~~ values of indicators ~~associated~~ aligned with each of the award groups are generated based on a wager made by the player.

Claim 30 (currently amended): A gaming device comprising:

a plurality of award groups, each of said award groups including at least one indicator ~~and at least one award~~, a plurality of said award groups including a plurality of indicators;

a plurality of awards, wherein each of the award groups is associated with at least one of said awards;

~~an indicator generator operable to generate and associate a number of indicators with each of the award groups; and~~

a processor operable to:

(a) cause the indicator generator to generate and associate a number of indicators with each of the award groups,

(b) accumulate a quantity ~~the number of~~ indicators in each of the award groups ~~based on corresponding to~~ the number of indicators associated with ~~the that~~ award groups group by the indicator generator,

(c) when all of the indicators have been accumulated in any of said award groups, indicate the awards associated with ~~any of the the~~ award groups ~~when in which~~ all of the indicators have been accumulated ~~in said award groups~~,

(d) randomly determine whether to provide any of the indicated awards to a player,

(e) if it is determined not to provide the indicated awards to the player, reset the indicators in the award groups ~~including associated with~~ the indicated awards and cause the indicator generator to generate and associate ~~a one of said~~ number of indicators with each of the award groups ~~if it is determined that the indicated awards are not to be provided to the player~~, and

(f) if it is determined to provide the indicated awards to the player, provide any indicated awards to the player ~~if it is determined that the indicated awards are to be provided to the player~~.

Claim 31 (original): The gaming device of Claim 30, which includes a probability of providing an award to a player associated with each of the awards.

Claim 32 (original): The gaming device of Claim 31, wherein the probability of providing the awards to the player is randomly determined.

Claim 33 (original): The gaming device of Claim 31, wherein the probability of providing the awards to the player is pre-determined.

Claim 34 (original): The gaming device of Claim 31, wherein the probability of providing the awards to the player is determined based on a wager made by the player.

Claim 35 (original): The gaming device of Claim 31, wherein at least two of the probabilities associated with the awards are different.

Claim 36 (original): The gaming device of Claim 31, wherein all of the probabilities associated with the awards are different.

Claim 37 (original): The gaming device of Claim 30, which includes at least one illumination device connected to each of the indicators.

Claim 38 (original): The gaming device of Claim 37, wherein the illumination devices include different color lights.

Claim 39 (currently amended): The gaming device of Claim 38, wherein the illumination devices connected to the indicators of at least two of the award ~~columns~~ groups include different color lights.

Claim 40 (currently amended): The gaming device of Claim 30, wherein the numbers of indicators associated with each of the award groups by the indicator generator are randomly generated.

Claim 41 (currently amended): The gaming device of Claim 30, wherein the numbers of indicators associated with each of the award groups by the indicator generator are generated based on a wager made by the player.

Claim 42 (currently amended): The gaming device of Claim 30, wherein the processor is operable to reset at least one of the indicators in at least one of the award groups ~~including~~ associated with an indicated award when it is determined that the indicated award is not to be provided to the player.

Claim 43 (currently amended): A gaming device comprising:

a display device;

a plurality of award groups displayed by said display device, each of said award groups including at least one indicator ~~and at least one award~~, a plurality of said award groups including a plurality of indicators;

a plurality of awards, wherein each of the award groups is associated with at least one of said awards;

a rotatable display positioned adjacent to the award groups and connected to the display device, said rotatable display including a plurality of fixed values, each of said values representing corresponding to a numbers number of indicators; and

a processor operable to:

(a) rotate the rotatable display,

(b) cause the rotatable display to stop and align one of the values with each of the award groups,

(c) for each of the award groups, accumulate the number of indicators in each of the award groups based on the number of indicators associated with the award groups corresponding to the value aligned with that award group,

(d) when all of the indicators have been accumulated in any of said award groups, indicate the awards associated with any of the said award groups when in which all of the indicators have been accumulated in said award groups,

(e) randomly determine whether to provide any of the indicated awards to a player,

(f) if it is determined not to provide the indicated awards to the player, reset the indicators in the award groups including associated with the indicated awards and cause the rotatable display to rotate and associate the fixed one of the values with each of the award groups ~~if it is determined that the indicated awards are not to be provided to the player, and~~

(g) if it is determined to provide the indicated awards to the player, provide any indicated awards to the player ~~if it is determined that the indicated awards are to be provided to the player.~~

Claim 44 (original): The gaming device of Claim 43, which includes a substantially transparent plate including different color sections which is positioned adjacent to the rotatable display.

Claim 45 (currently amended): The gaming device of Claim 43, which includes a probability of providing an award to a player associated with each of the awards ~~in~~ associated with the award groups.

Claim 46 (original): The gaming device of Claim 45, wherein the probability of providing the awards to the player is randomly determined.

Claim 47 (original): The gaming device of Claim 45, wherein the probability of providing the awards to the player is pre-determined.

Claim 48 (original): The gaming device of Claim 45, wherein the probability of providing the awards to the player is determined based on a wager made by the player.

Claim 49 (original): The gaming device of Claim 45, wherein at least two of the probabilities associated with the awards are different.

Claim 50 (original): The gaming device of Claim 45, wherein all of the probabilities associated with the awards are different.

Claim 51(original): The gaming device of Claim 43, which includes at least one illumination device connected to each of the indicators.

Claim 52 (original): The gaming device of Claim 51, wherein the illumination devices include different color lights.

Claim 53 (original): The gaming device of Claim 51, wherein the illumination devices connected to the indicators of at least two of the award groups include different color lights.

Claim 54 (currently amended): The gaming device of Claim 43, wherein the ~~numbers~~ values ~~of indicators associated~~ aligned with each of the award groups are randomly generated.

Claim 55 (currently amended): The gaming device of Claim 43, wherein the ~~numbers of indicators~~ values ~~associated~~ aligned with each of the award groups are generated based on a wager made by the player.

Claim 56 (currently amended): The gaming device of Claim 43, wherein the processor is operable to reset at least one of the indicators in at least one of the award groups ~~including~~ associated with an indicated award when it is determined that the indicated award is not to be provided to the player.
